

Electric Pedestrian Pallet Stacker

FES15

- Pallet Stacker is a new generation of products developed for the warehousing of logistics Equipment. It is driven by battery. The maximum load capacity is 1.5T.
- Horizontal handling and stacking of low to medium weight cargo;
- Middle and long distance handling and stacking;
- Perfect for loading, unloading and handling palletized goods in warehouses, supermarkets and workshops.
- The FE15 Electric pedestrian pallet stacker is low maintenance and offers a high-power AC drive system which provides reliable driving power.
- The 210AH large-capacity battery has a high endurance;
- The power adapter is waterproof and dust proof and provides reliable protection for the line and greatly reduces electrical faults;
- Retractable floating suspension system for easy braking, pure electronic steering, and integrated joystick all ensure a safe and easy to operate experience.
- The forklift utilizes a 5 point, low gravity design with a high-strength steel plate frame structure.

Specs

Machine Specs	
Power type	Battery
Battery	Lead-acid, 24V / 210AH
Operation type	Stand-on
Service weight (incl. battery)	1100kg
Rated capacity	1500kg
Mast	2-Stage 3m
Dimensions	
Load center	600mm

Lifting height	3000mm
Forks size	1150/190/56mm
Min ground clearance	30mm
Dimensions	2518 x 850 x 2025mm
Turning radius	1755mm
Performance	
Max. climbing ability	8/10%
Driving speed loaded	5km/h
Driving speed unloaded	6km/h
Lifting speed loaded	90mm/s
Lifting speed unloaded	130mm/s
Lowering speed loaded	110mm/s
Lowering speed unloaded	130mm/s
